PROFESSIONAL EXPERIENCE

Kudi Inc. (YC W17 – Kudi is simplifying payment across Africa)   Remote
Front-End Engineer   May 2021 – Present
- Collaborated with the UX/UI design team to improve existing applications and increase conversion rates by 20%; actively design multiple dynamic and browser compatible pages using JavaScript (React, Redux).
- Building an improved version of Kudi Marketplace with new user-focused designs and features that will improve customer satisfaction by 30%, reduce reported bug issues by over 15% and lead to increase in revenue by 25%.
- Contribute to the in-house UI library to create reusable components that saved over 250 hours of development time per month; build extensive test coverage for components with react testing library, reducing user-reported bugs.

DuroNetworks (A Patrick Gold Microfinance Bank company)   Lagos, Nigeria
Front-End Engineer   Jul 2020 – May 2021
- Led the frontend team in each step of the product development process from ideation to development improvement for 3 financial technology solutions -- GetriPay, GetriVest, Getrishop. These solutions allow fund transfer, bill payments, savings, virtual cards, loans, QR payments and investments for users across Africa.
- Worked closely with an agile team of 6 members that developed and maintained multiple visual elements of web applications by translating UI/UX design wireframes into code, producing high quality markup using React.

Grandilo Technology   Remote
Software Engineer Intern   Dec 2019 – Mar 2020
- Collaborated with in-house designers to redesign a job search and CV web application using HTML, CSS and Javascript, making it responsive for mobile devices and increasing customer engagement by over 22%.
- Developed a client's travel agency web application which achieved over 95% customer satisfaction.

Cloud Soft Systems Network   Lagos, Nigeria
Intern Website Developer   Dec 2017 – Feb 2018
- Worked with 2 developers in building cross-browser compatible and accessibility compliant websites, resulting in 45% faster load time than industry average using WordPress for a diverse range of clients.

EDUCATION

University of Lagos   Lagos, Nigeria
Bachelor of Science, Physics Education   2017
- Relevant Coursework: Computer Science, Calculus, Mechanics, Theoretical Physics, Statistical Physics

SKILLS

JavaScript (React, Redux)	Nextjs	Material UI	Git
Typescript	Styled components	Responsive UI Design	Agile methodology
HTML/CSS	Bootstrap	Tailwind	React testing library

OTHER SELECTED PROJECTS

AGRIFIC – Developed from scratch, a B2B2C ecommerce platform that provides a comprehensive trade hub, which connects African farm producers and agro-commodity businesses with local and international buyer.

YOUBOX – Created a compatible, web responsive, custom video uploading/streaming app, built with react which allows users to seamless upload videos, share link with people, like and comment.

COVID-19 DASHBOARD – Built and released a responsive COVID19 statistics dashboard for cases in Nigeria, allowing users to know the spool custom data for each state. It is searchable and paginated.

EXPENSE AND INCOME TRACKING APP – Designed and implemented a web application which allows users to keep track of income and expenses in real time; optimized code to increased user time by 5 minutes.
